

The Extreme Optimist

Specifications and US Price list

Performance Sailcraft 2000 and its Singapore Licensee Builder of the Byte, Sailboats Enterprise, have combined to bring to North America what we believe to be the highest quality and the best value in an IOD95 Optimist being built today - anywhere.

The glasswork is impeccable and the detailing unmatched. There are no exposed fiberglass edges anywhere in the cockpit as all edges are rolled over and down to the floor or top-sides.

There is no scrimping - all fastening plates are stainless steel, buoyancy bag securing straps are robust and long lasting, fittings are Optiparts, blocks and ratchet Ronstan, hiking straps are padded - in short, no detail has been spared. The buoyancy bags are either Holt or Optiparts; both have stood up to the brutal South East Asian conditions.

PS2000 Xtreme Bareboat

There is only one version of the hull - the **Bareboat**. It is the same hull and fittings for all these packages:

PS2000 **Club** Package

PS2000 **Regatta** Package

PS2000 **Race** Package

PS2000 High Modulus Fiberglass foils

Hand crafted and hand finished, these foils are built using a tested and proven Australian building system and are the finest, limited production, fiberglass foils available in the market today. We put them on all our boats except the top end PS2000 **Race** Package and that includes the PS2000 **Club** Package. We do not offer starter or bottom end foils. The set includes all hardware, tiller and extension.

PS2000 Epoxy Lam Wood foils

For the top end racer, where the stiffest foils at the lightest weight are the requirement, these laminated epoxy foils represent the finest in craftsmanship, quality and performance. They are standard on the PS2000 **Race** Package and also available as replacement parts. The set includes all hardware, tiller and extension.
